This course specification provides a summary of the main features of the course, identifies the aims and learning outcomes of the course, the teaching, learning and assessment methods used by teaching staff, and the reference points used to inform the curriculum.

This information is therefore useful to potential students to help them choose the right course of study, to current students on the course and to staff teaching and administering the course.

Further detailed information on the individual modules within the course may be found in the relevant module descriptors and the Course Handbook provided to students on enrolment.

Please refer to the [Module Web Search](#) for further information on the course structure and modules.

Educational aims of the course

The [Course Specification Guidance Notes](#) include advice on what to include in this section.

- Provide a challenging and stimulating framework of study for full time students that facilitates personal, academic and professional development as accredited by the Association for Project Management
- Develop a systematic understanding of relevant knowledge and a critical awareness of current issues at the forefront of project management and their application to all aspects of organisations commissioning, managing or delivering projects
- Enable students to apply project management principles in a strategic and business management context
- Enable students to develop high-level knowledge in a range of project related disciplines that will enable the development of a project management culture
- Provide successful candidates with the necessary skills and knowledge to deal with complex project management issues as practitioners
- Provide students with the means and skills to transfer the concepts and experience gained from the course into work place situations
- Facilitate the formulation, planning and execution of a research project in the field of project management
- Develop critical evaluation and assessment skills of the literature, research and knowledge gained in the course
- Enable students to demonstrate the ability to analyse data, make decisions and plan both critically and objectively, and to present results and conclusions in the form of coherent arguments with an assessment of future needs and consequences

This is an interdisciplinary degree providing students with the knowledge to act as effective project management professionals in any size or type of organisation. It is also instructive to managers of other disciplines who need to understand how to manage projects that their organisation may undertake. This programme seeks to provide students with appropriate knowledge and understanding to enable them to make an effective contribution to the implementation of the practices of project management. Knowledge and understanding is developed in relation to the strategic, tactical and operational project management with appropriate academic rigour in university taught units.

Disclaimer

The University of Portsmouth has checked the information provided in this Course Specification and will endeavour to deliver this course in keeping with this Course Specification. However, changes to the course may sometimes be required arising from annual monitoring, student feedback, and the review and update of modules and courses.

Where this activity leads to significant changes to modules and courses there will be prior consultation with students and others, wherever possible, and the University of Portsmouth will take all reasonable steps to minimise disruption to students.

It is also possible that the University of Portsmouth may not be able to offer a module or course for reasons outside of its control, for example, due to the absence of a member of staff or low student registration numbers. Where this is the case, the University of Portsmouth will endeavour to inform applicants and

students as soon as possible, and where appropriate, will facilitate the transfer of affected students to another suitable course.
