This course specification provides a summary of the main features of the course, identifies the aims and learning outcomes of the course, the teaching, learning and assessment methods used by teaching staff, and the reference points used to inform the curriculum.

This information is therefore useful to potential students to help them choose the right course of study, to current students on the course and to staff teaching and administering the course.

Further detailed information on the individual modules within the course may be found in the relevant module descriptors and the Course Handbook provided to students on enrolment.

Please refer to the [Course and Module Catalogue](#) for further information on the course structure and modules.

Educational aims of the course

The course is designed to provide student teachers with the opportunity to study the theory and practice of education from the perspective of learners, teachers, administrators, policymakers and other key stakeholders in the system of formal education. The teaching experience is within the post-compulsory education sector and together with academic study equips the student teacher with the knowledge, understanding and skills that they need to begin to develop as a professional educator. The programme also provides a strong theoretical and research-based perspective to extend their knowledge and understanding and to allow them to reflect critically upon their own personal and professional values.

Main principles that underpin this modular programme

- To promote an excellent learning experience for all students including educational and personal success and independence in an inclusive, accessible, relevant, supportive environment
- To develop standards of good professional practice, skills and attitudes required by the post-compulsory education sector in managing the teaching and learning process, developing the curriculum and supporting the learner
- To provide a practice-based programme that creates effective opportunities for student teachers to reflect on their professional practice and enhance their teaching competence
- To apply learning theories to practice when planning, implementing and evaluating teaching and learning programmes in the post-compulsory education sector
- To generate personal and professional self-confidence from which to create a sound base for further professional and career development
- To enable the development of professional practice to a recognised national standard
- To encourage the professional sharing of subject specific experiences and knowledge relating to teaching and learning between student teachers and tutors

Disclaimer

The University of Portsmouth has checked the information provided in this Course Specification and will endeavour to deliver this course in keeping with this Course Specification. However, changes to the course may sometimes be required arising from annual monitoring, student feedback, and the review and update of modules and courses.

Where this activity leads to significant changes to modules and courses there will be prior consultation with students and others, wherever possible, and the University of Portsmouth will take all reasonable steps to minimise disruption to students.

It is also possible that the University of Portsmouth may not be able to offer a module or course for reasons outside of its control, for example, due to the absence of a member of staff or low student registration numbers. Where this is the case, the University of Portsmouth will endeavour to inform applicants and students as soon as possible, and where appropriate, will facilitate the transfer of affected students to another suitable course.
