This course specification provides a summary of the main features of the course, identifies the aims and learning outcomes of the course, the teaching, learning and assessment methods used by teaching staff, and the reference points used to inform the curriculum.

This information is therefore useful to potential students to help them choose the right course of study, to current students on the course and to staff teaching and administering the course.

Further detailed information on the individual modules within the course may be found in the relevant module descriptors and the Course Handbook provided to students on enrolment.

Please refer to the [Course and Module Catalogue](#) for further information on the course structure and modules.

Educational aims of the course

The Music Technology Programme aims to equip students with a critical and reflective knowledge and understanding of their subject and the appropriate skills to enter the creative industries in various thematic areas including music, film, multimedia, games, studio recording, studio design, sound installation, sound engineering, studio technician/management and community work, independent sound production, education and software design.

Students will follow a curriculum balanced between the development of skills in recording, production, composition, sound design, analysis and performance set within a structure that supplies a choice of development in media, studio or computer applications.

In addition and more generally, the course aims to:

- Provide a challenging, stimulating and supportive study environment where students can learn how to connect technical skills, theoretical understanding and creative practice.
- Provide a framework whereby individual study paths may be forged based on choice from a range of options.
- To equip students with the necessary transferable skills for lifelong learning, employability and flexibility in the context of changing global labour markets.
- Accommodate student needs in relation to maximizing their career potential by enabling them to develop knowledge, understanding and skills in their chosen subject area.
- Promote career aspirations by including topics on general professional practice and study skills.
